Atlantic Salmon

Chinook (King) Salmon

Coho Salmon

Rainbow Trout (Steelhead)

Pink Salmon

Brook Trout

Brown Trout

Lake Trout

Rainbow Trout

Splake (Brook trout x Lake trout cross)

The Michigan Department of Natural Resources is committed to the conservation, protection, management, use and enjoyment of the State's natural resources for current and future generations.

The Natural Resources Commission is the governing body for the Michigan Department of Natural Resources. In providing a strategic framework for the DNR to effectively manage the state's resources, the NRC works closely with a broad cross-section of constituencies to establish and continuously improve natural resources management policy.

About This Guide

The information in this guide provides fishing regulations that pertain only to the taking of trout and salmon from inland waters and is not a complete collection of fishing regulations and laws. Fishing regulations for other species taken from inland waters, and for trout and salmon taken from the Great Lakes, can be found in the *Michigan Fishing Guide*. Copies of fisheries orders can be found online at www.michigan.gov.dnr.

The regulations in this guide will be in effect for two complete fishing seasons — April 1, 2006 through March 31, 2008. Although regulations are in effect for two seasons, anglers still must purchase a new fishing license each year. To help reduce costs to the Game and Fish Fund, which pays for fishing programs in Michigan, anglers should keep this fishing guide for use in both the 2006-2007 and 2007-2008 fishing seasons.

Gear Restrictions

On all streams (including tributaries to the Great Lakes) from August 1 through May 31, it shall be unlawful to use multi-pointed hooks exceeding 3/8 inch between point and shank and/or single-pointed hooks exceeding 1/2 inch between point and shank. Also during this period it shall be unlawful to use lures exceeding one ounce. The Detroit River, St. Clair River and St. Marys River are exempt from these restrictions.

Description of Inland Waters

Inland waters are all waters within the jurisdiction of the state except the Great Lakes, and the bays and connecting waters. The connecting waters between Lake Superior and Lake Huron include that portion of the St. Marys River located within this state. The connecting waters of Lake Huron and Lake Erie include the St. Clair River, Lake St. Clair and the Detroit River (beginning at the imaginary line extending due south of the Windmill Point Light, Wayne County and ending at the imaginary east-west line drawn through the most southerly point of Celeron Island). Inland waters also include all inland lakes, streams and tributaries to the Great Lakes.

Common Terms

Artificial Fly means any commonly accepted single hook wet and dry flies, streamers, and nymphs without spinner, spoon, scoop, lip or any other fishing lure or bait attached. The fly or leader may be weighted but no weight shall be attached to the fly or to the terminal tackle in a manner that allows the weight to be suspended from or below the hook.

Artificial Lure means a manmade lure manufactured to imitate natural bait. Artificial lures include spoons, spinners and plugs made of metal, plastic, wood and other non-edible materials. They also include plastic products made to resemble worms, eggs, fish and other aquatic organisms.

Catch and Immediate Release means fish caught must be returned immediately to the water without injury and may not be possessed.

Daily Limit means the total number of fish, amphibians or reptiles that you are permitted to catch and keep in one day. Also see Possession Limit.

Designated Trout Lake means any lake so designated by the state in which trout are the predominant game fish. All Type A, all Type D and certain Type B lakes are considered designated trout lakes. FO-200 lists all designated trout lakes and is available upon request, or can be found online at www.michigan.gov/dnr. You must have an all-species license to fish these waters.

Designated Trout Stream means any stream so designated by the state that contains a significant population of trout or salmon. FO-210 lists all designated trout streams and is available upon request, or can be found online at www.michigan.gov/dnr. You must have an all-species license to fish these waters.

Open Season means the period of time during which it is legal to fish for a given species.

Possession Limit is equal to the Daily Limit. Except a person may possess up to two (2) additional limits of coho, chinook, or pink salmon taken during previous fishing days **provided** that the additional limits are processed fish (canned, cured by smoking or drying, or frozen). Anglers who have not attained the age of 17 are entitled to the possession limit even though they do not have a fishing license. A person fishing waters bordered by other states or provinces AND possessing multiple fishing licenses may possess the limit allowed for ONLY ONE license while in transit, but while fishing in Michigan waters, must comply with Michigan possession and size limits.

Possession Season is that portion of the open season during which it is legal to harvest fish.

For information on the Michigan Department of Community Health's Fish Consumption Advisory, see page 2 or go to www.michigan.gov/mdch

REPORT ALL POACHING Call: 800-292-7800

All Species License

All-species fishing licenses are required for all anglers, age 17 or older, to take and possess trout and salmon from any public waters. This license also is required when fishing the following waters:

- All trout lakes designated by the DNR under FO-200 (All Type A, all Type D and designated Type B lakes as noted on pages 3-14).
- All Type 5, 6 and 7 streams designated by the DNR under FO-200.
- All waters of the Great Lakes when trout and/or salmon are the target species.
- All designated trout streams (FO-210) when trout and/or salmon are the target species.

Catch and Immediate Release Fishing

When practicing catch and release, please follow these suggestions to reduce the risk of injury to the fish.

- Land your catch carefully and quickly. If possible avoid handling the fish at all and remove the hook with pliers.
- Use a landing net made of soft or knotless mesh and always try to net your fish head first.
- Try to keep the fish in the water and gently cradle it while carefully removing the hook.
- Leave your fish in the water until you are ready to take a photo.
- Keep your fingers out of the fish's gills since a torn gill could cause the fish to bleed to death.
- Touch your fish as little as possible. Always wet your hands when touching your fish.
- Cut the line near the hook if a fish is deeply hooked. A steel hook will rust away leaving the fish unharmed.
- Release your fish, pointing it into a slow current or gently moving it back and forth until its gills are working properly and the fish regains its balance. Once fully recovered, allow the fish to swim from your hands (big fish may take longer to recover).

Michigan - Wisconsin Boundary Waters

Please see the *Michigan Fishing Guide* for fishing regulations on inland waters that form a common boundary between the states of Michigan and Wisconsin.

Isle Royale

Contact Isle Royale National Park Visitor Center for fishing regulations on inland waters (906-482-0984).

Sylvania Wilderness Area (Gogebic County)

Any angler fishing the waters contained in the Sylvania Wilderness Area, Gogebic County, should refer to the regulations listed in the *Michigan Fishing Guide*.

Fishing and Harvest Closures (Spawning Closures)

Michigan, like many states, prohibits fishing for various species at certain times of the year. These seasonal closures generally coincide with spawning periods and are often referred to as spawning closures. Many anglers and managers tend to think of these regulations as providing specific protection to spawning fish, and the timing and length of closed seasons are generally related to the timing and duration of spawning seasons. These closures are indicated by lake or stream in the county listings. Lakes and streams are closed to all fishing during the period listed. Outside of the closure period, the respective Type regulations apply.

Maps

Included in this guide is a section containing color-coded maps (pages 17-45). The maps were developed to assist anglers in locating waters that contain trout/salmon and the regulations that pertain to those lakes/streams. **The maps are to be used as a general reference only.** For exact boundaries of regulations on stream types 2-7, please refer to the text portion of this guide.

Fish Consumption Advisory

The Michigan Department of Community Health (MDCH) advises women of childbearing age and children under 15 to use caution when eating certain kinds and sizes of fish from the Great Lakes and from some inland lakes and streams. Fish in these waters contain levels of toxic chemicals that may be harmful if those fish are eaten too often. The Michigan Fish Advisory, compiled by MDCH, shows you which fish are okay to eat and how often they can be eaten. The advisory is available online at **www.michigan.gov/mdch** or by contacting MDCH, Lewis Cass Building, 320 South Walnut Street, Lansing, MI 48913; phone (517) 373-3740 or TTY (517) 373-3573.

The Michigan Department of Natural Resources provides equal opportunities for employment and access to Michigan's natural resources. Both state and federal laws prohibit discrimination on the basis of race, color, national origin, religion, disability, age, sex, height, weight or marital status under the Civil Rights Acts of 1964 as amended (MI PA 453 and MI PA 220, Title V of the Rehabilitation Act of 1973 as amended, and the Americans with Disabilities Act). If you believe that you have been discriminated against in any program, activity, or facility, or if you desire additional information, please write: Human Resources, Michigan Department of Natural Resources, P.O. Box 30028, Lansing, MI 48909-7528 or the Michigan Department of Civil Rights, Cadillac Place, Suite 3-600, 3054 W. Grand Blvd., Detroit, MI 48202 or the Division of Federal Assistance, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Mail Stop MBSP-4020, Arlington, VA 22203. This publication is available in alternative formats upon request. Number of copies printed: 800,000. Total cost: \$131,834. Cost per copy: \$.16.

County listing of lakes and streams

Below is a listing of the inland lakes and streams that are managed for trout and salmon, along with their respective type of regulation. For inland lakes, the lake name will appear under the appropriate county and will be followed by a letter (A-F). The letter designates the Type of regulations that apply to that lake. For streams, the stream name will be followed by a number (2-7) and any upstream/downstream boundaries that apply to that section of stream. **Type 1 streams are not listed in the text, but they do appear in green on the maps.** For a complete listing of all trout streams, refer to FO-210 (available online or at all DNR Fisheries Offices). **Please see pages 15-16 for a description of each Type of regulation.** An **SC** indicates a fishing closure for the area and period mentioned. This guide can also be found online at www.michigan.gov/dnr.

- * 5 fish, with no more than 3 fish 15 inches or larger, and no more than 1 Atlantic salmon.
- ** Trout/salmon may not be possessed on Type 7 streams regardless of where caught, EXCEPT: for children under the age of 12, the daily possession limit is one fish, the minimum size limit is 8 inches and the maximum size limit is 12 inches. Fish less than 8 inches or greater than 12 inches must be released.
- + It is unlawful to use or possess live bait, dead or preserved bait, organic or processed food, or scented material on any of the waters or on shore.

Note: It is unlawful to fish for any species or possess fishing devices along a stream closed to fishing.

Research Areas: Portions of the Au Sable River Mainstream (Oscoda County), Gratiot River (Keweenaw County), Hurricane River (Alger County), Huron River (Oakland County), Little Carp River (Gogebic County), Mosquito River (Alger County), Salmon-Trout River (Marquette County) and Seven Mile Creek (Alger County) are under special regulations. Similarly, Spring Mill Pond (Livingston County), is under special regulations. All of these waters are indicated on the maps with gray shading. Please see the county listings for specific regulations on these waters.

Except for streams in the Michigan-Wisconsin Boundary Waters, any other inland stream not classified by Type is open all year with an 8-inch minimum size limit and a 5 fish daily possession limit, no more than 3 of which may be 15 inches or greater. Artificial lures and all types of natural bait may be used. Please see Michigan Fishing Guide for Michigan-Wisconsin Boundary Waters regulations.
